

Duffy Climbs in the ACT Top 50

HENDERSON, CO (March 31, 2020) Duffy Crane & Hauling climbed to the 26th spot in the Specialized Lifting North America TOP 50 in the most recent survey, published by *American Cranes & Transport (ACT) Magazine*.

According to ACT, "Rigging and lifting jobs are becoming more complex and require solutions that involve all types of specialized lifting equipment. From power plants to oil and gas, jobs continue to grow alongside the demand for equipment. Over the course of the last year, the ACT SPECIALIZEDLIFTING 50 list has seen both increases and decreases across all categories."

Jeffrey L. Cummings, president of Duffy Crane & Hauling, attributes Duffy's steady climb up the Top 50 to its ability to capitalize on new technologies and the ever-changing needs of its customers. "Our customers are constantly pressed to deliver projects that are executed to the highest levels of safety & efficiency. Our climb up the Top 50 confirms our commitment to provide services in line with the on-going trend toward shorter construction schedules performed with larger equipment," Cummings added.

The continued climb up the Top 50 list is due to recent additions of equipment and branch locations. In 2019, Duffy Crane & Hauling made significant gains with the addition of its Intermodal Operations Facility in Eaton, Colorado as well as the roll outs of new additions such as the 600 ton Liebherr LTM1500, Terex/Demag AC220-5 (245T) and Kobelco CK1100G conventional crawler (110T).

Founded in 1886 in Denver, Colorado as a family owned and operated business, Duffy Crane and Hauling is one of Colorado's oldest and most trusted companies. Duffy's long history of continued success is due to our on-going commitment to our customers in providing innovative solutions to complex lifting and transportation.
